## **DETAILED ACTION**

### ***Response to Preliminary Amendment***

1. The Applicant's preliminary amendment filed on 07/11/2006 was entered. As the results, the original claims 1-10 were cancelled as indicated. New claims 11-20 were entered. At this point, claims 11-20 are pending in this application.

### ***Allowable Subject Matter***

2. Claims 11-20 are allowed.

3. The following is an examiner's statement of reasons for allowance:

There has been a plurality of references that teach prepaid SIM card or smartcard for use with a wireless telecommunication terminal, such as a cellular phone or the like. Those references teach that prepaid amount data is transmitted from a financial institution such as from a bank or credit issuer, etc., and stored in the SIM card or smartcard. When a user of the wireless telecommunication terminal tries to initiate a service, such as making a call, data transmission request, download audio file such as MP3 music, etc. The prepaid parameters as well as identification data of the wireless telecommunication terminal are encoded or encrypted and transmitted to a remote station, such as a base station, mobile switch station (MSC) or the like. At the remote station, the received encoded data associated with the request is decoded and processed. Those references of the prior art are as followings:

Martineau (US. Pat. #: 5,915,226),

Singhai (Pub. No.: US 2007/0042755),  
Timonen et al. (US. Pat. #: 6,741,848),  
Bianchi (US. Pat. #: 7,225,334),  
Tarkkala (Pub. No.: US 2006/0246872),  
Guion et al. (Pub. No.: US 2004/0210528),  
Kiel et al. (Pub. No.: US 2003/0027549), and  
Herzog (US. Pat. #: 7,127,231).

The most related reference to the claimed invention is Sevilla (Pub. No.: US 2006/0189296) which teaches a prepaid system for use with a smart card or SIM card associated with a communication device. When the communication device requests a service, a plurality of data flow related to the service is encrypted into a first encrypted (digital) key and transmitted to a remote station, such as a server. The server may use a second encrypted key to decrypt and to process the request. It is noted that the PCT filing date of the Sevilla reference on July 12, 2004 is fall behind the claimed priority date of the Foreign Application which is on January 29, 2004. Therefore, the Sevilla reference can not be used as a prior art, alone or in combination with above references, to against the claimed invention in claims 11-20.

Therefore, the prior art of record fails to clearly teach or fairly suggest a combination of featured steps of a method of transmitting service data between a first telecommunication device and a second telecommunication device of a telecommunication network, as recited in the method independent claim 11.

Regarding claims 12-20, they are dependent claims. Therefore, they are also allowed with the reasons set forth in their independent claim 11.

Art Unit: 2614

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
